

## EAST END BIRD REPORT 2004

This report is a record of birds observed on seven sites in the East End of London during 2004. Each site was visited once a month and all birds seen, heard or flying over recorded. Visits normally take one hour, with the same route taken on each visit.

The sites selected are varied, but the one thing they have in common is that they represent habitats which are "green" and therefore likely to contain birds not normally associated with densely populated Inner City areas.

- A : VICTORIA PARK 51 species
  - B : LIMEHOUSE 37 species
  - C : TOWER HAMLETS CEMETERY 31 species
  - D : GARDEN 30 species
  - E : GREENWAY 45 species
  - F : WICK FIELD 41 species
  - G : MUDCHUTE FARM 45 species
- TOTAL 65 species**

**Victoria Park : Grid ref: TQ 363 840 : Area: 90 ha**

The Park dominates the northern part of the Borough, it is bounded on two sides by the Hertford Union and Regent's Canals; the busy A102M motorway passes close to the eastern edge. The Park is cut in two at its centre by Grove Road. There are ornamental lakes in the western and eastern sections of the Park. Although most of the Park is dominated by close mown grass used for pitches and recreation there are pockets of trees and shrubbery.

**Limehouse: Grid ref:TQ 3681: Area : 1km sq**

This area is surveyed as part of the BTO's Breeding Bird Survey. The eastern part of the Survey follows the Regent's Canal from Mile End Road to Limehouse Basin. The western part through typical East End terraced streets and blocks of flats.
