

EAST END BIRD REPORT 2005

This report is a record of birds observed on seven sites in the East End of London during 2005. Each site was visited once a month and all birds seen, heard or flying over recorded. Visits normally take one hour, with the same route taken on each visit.

The sites selected are varied, but the one thing they have in common is that they represent habitats which are "green" and therefore likely to contain birds not normally associated with densely populated Inner City areas.

- A : VICTORIA PARK 51 species
 - B : LIMEHOUSE 40 species
 - C : TOWER HAMLETS CEMETERY 33 species
 - D : GARDEN 25 species
 - E : GREENWAY 40 species
 - F : WICK FIELD 44 species
 - G : MUDCHUTE FARM 44 species
- TOTAL 67 species**

Victoria Park : Grid ref: TQ 363 840 : Area: 90 ha

The Park dominates the northern part of the Borough, it is bounded on two sides by the Hertford Union and Regent's Canals; the busy A102M motorway passes close to the eastern edge. The Park is cut in two at its centre by Grove Road. There are ornamental lakes in the western and eastern sections of the Park. Although most of the Park is dominated by close mown grass used for pitches and recreation there are pockets of trees and shrubbery.
