** London Invasive Species Initiative categories

1. Species not currently present in London but present nearby or of concern because of high risk of negative impacts if they arrive
2. Species of high impact or concern present at specific sites that require attention (control, management, eradication etc)
3. Species of high impact or concern, widespread in London & require concerted, coordinated, extensive action to control/eradicate
4. Species which are widespread for which eradication is not feasible but where measures to stop spread to other sites may be required
5. Species for which insufficient data or evidence was available to be able to prioritise
6. Species that are not currently considered to pose a threat or have the potential to cause problems in London
